

Overview

Becker specializes in flexible, efficient, and precision-driven robot programming services specifically tailored for the automotive manufacturing industry. Our experienced programmers ensure that your robotic systems operate smoothly, reliably, and efficiently—optimizing your processes without interrupting ongoing production.

Optimize Your Production with Professional Robot Programming

With our expert programming services, robots and applications can be programmed seamlessly—without production downtime. We assist you in effectively preparing for product changeovers, commissioning offline systems, and swiftly adapting to any changes within your production process.

Our proven programming approach relies on intuitive, structured programming standards, precision motion control, and cycle time optimization. These best practices ensure maximum efficiency, productivity, and profitability right from the initial startup phase.

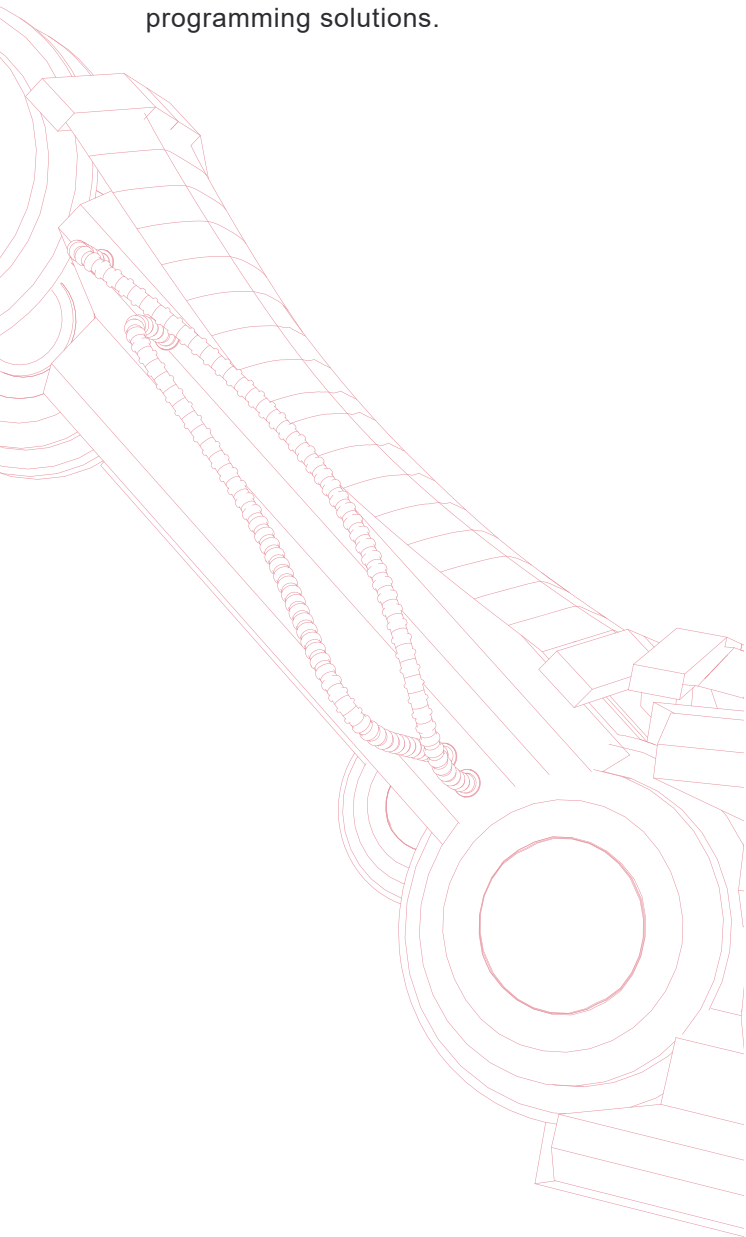

Our Programming Capabilities Include:

- Robotic Welding (Spot, MIG/MAG, Laser)
- Robotic Assembly & Handling
- Quality Inspection & Vision Systems
- Robot Integration & Commissioning
- Simulation & Offline Programming
- Cycle Time Analysis & Optimization
- Programming Standards Development
- On-site Troubleshooting & Support

Your Advantages with Becker Robot Programming

- **Efficient Commissioning:** Program and simulate offline—minimizing downtime during production transitions.
- **Flexible Response:** Quickly adapt to changing manufacturing demands with flexible programming solutions.
- **Optimized Cycle Times:** Achieve optimal productivity through meticulously fine-tuned motion control and cycle optimization.
- **Customized Programming Solutions:** Our experts assist in programming complex individual tasks or entire robotic production systems, tailored precisely to your requirements.
- **Sustainable Profitability:** Benefit from our extensive experience developing customer-specific programming standards, significantly improving the long-term efficiency and productivity of your projects.
- **Comprehensive Service & Support:** Becker's global support services continue after project completion, ensuring ongoing success and minimal downtime.
